duetto

# Work Smarter, Not Harder.

With month-level entry and the flexibility to make stay date level adjustments, you spend minutes, not days, building forecasts and budgets. Duetto's industry-first "smart spreading" technology takes updates to your monthly forecast and intelligently allocates them day by day, segment by segment.

## Key Benefits

### Unify Sales and Revenue Management

Give your sales managers instant access to optimized rate recommendations for every group inquiry and enhance collaboration within the app's purpose-built workflow.

### Protect ADR When Quoting Groups

Create checks and balances between the sales and revenue teams to ensure the right groups receive the right rates.

### Share Data Among Systems

Eliminate time-wasting double entry and instead import your group reservations from your sales and catering system to run profit-driven displacement analysis.
