

ScoreBoard™

Simplify Your Financial Forecast

Create forecasts and reports more quickly and accurately allowing full visibility into your data for all properties at all times. Share reports across teams and with other stakeholders with ease so you can work more efficiently and effectively.

Work Smarter, Not Harder.

With month-level entry and the flexibility to make stay date level adjustments, you spend minutes, not days, building forecasts and budgets. Duetto's industry-first "smart spreading" technology takes updates to your monthly forecast and intelligently allocates them day by day, segment by segment.

Key Benefits

Save Time, Take Action

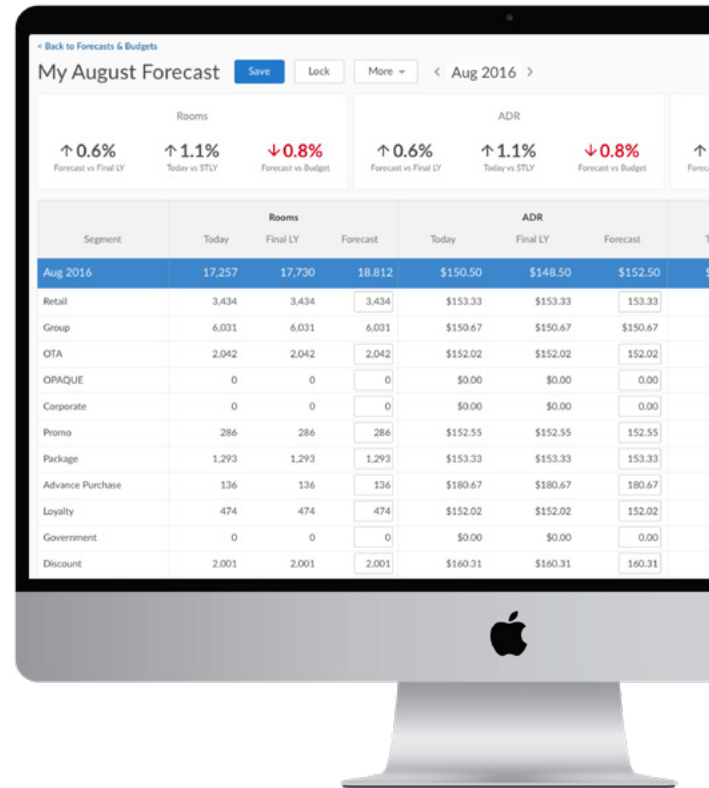

Stop waiting days for numbers to come in, and instead work with real-time data. Customize reports with dozens of different fields of data and share with one click.

Real-Time Visibility

Eliminate the wasted time manipulating data from your other systems and empower your whole organization to identify the most impactful trends across your business.

Multi-Property Management

Roll everything up into customizable reports capable of presenting the big picture across the entire organization, while still drilling down on property-level details.

Speaking of ScoreBoard

"What good is all this data if it takes too long to access it or make it actionable? We're confident that NH will be able to move beyond spreadsheets and develop better business strategies across 400 hotels around the world, now that we have far better visibility into our data and the ability to access and share it faster. Speed and accuracy make all the difference when hotel distribution and traveler preferences change so quickly."

Fernando Vives
Chief Commercial Officer, NH Hotel Group
