

Make smarter decisions and increase revenue with Duetto Advance

Most RMS have tech stack limitations resulting in infrequent daily updates. Coupled with incomplete and stale data, revenue managers miss real-time, critical changes in market dynamics, leading to suboptimal pricing.

Introducing Duetto Advance

Made possible by world-class data integrations, Duetto Advance combines market and event data with real-time streaming analytics for continuous optimization to ensure immediate response to market-driving changes to maximize profitability.

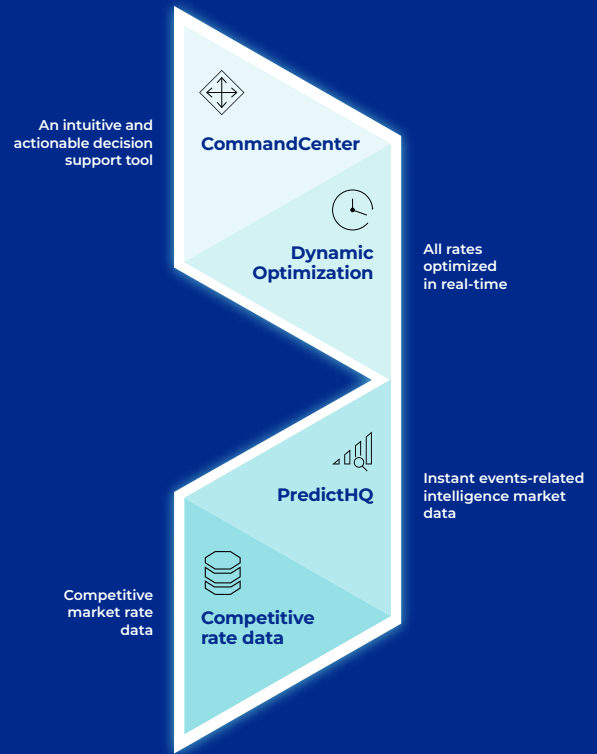

Advanced analytics you can use, data you can trust

Duetto Advance users with real-time, competitive rate and occupancy intelligence direct from the primary source. Added to this, our integration with PredictHQ gives hotels a snapshot of how local market events are likely to impact demand. All this data is presented in a visually actionable dashboard, customizable to your strategy.

- ▶ Ensure your hotels are always offering the best rates possible as Duetto's machine learning algorithms analyze market data and make real-time adjustments to prices.
- ▶ Access real-time data and automation features to give you more control over your pricing strategy, allowing you to respond quickly to market changes.
- ▶ Price in real-time with dynamic optimization continually flexing prices in line with changing market demand, delivering true real-time rate optimization.

Improve your Revenue Performance

With industry-leading data integrations, Duetto Advance provides the market intelligence you need to optimize every revenue opportunity, quickly and efficiently.

- ▶ **Integrated, comprehensive visualizations**
Track the pulse of your business with Duetto's CommandCenter dashboard. With a library of widgets, view key financial progress at every level for one property or your portfolio. Identify opportunities and risks using powerful visualizations. Stay one step ahead of the competition.
- ▶ **Real-time travel demand intelligence**
Access accurate, property-level competitive rate intelligence, occupancy, and demand data at your fingertips.
- ▶ **Manage by exception**
Be the first to know when local events are driving increases in your market demand with PredictHQ.
- ▶ **Easily manage complete portfolios**
Drive more profitable outcomes with our multi-property management portal, providing property, brand, and portfolio-level data and analytics.

Duetto Advance – actionable analytics for hotels, casinos, and resorts

Duetto Advance adds to an already great, award-winning product suite, including the world's #1 RMS - GameChanger.

An innovative tech stack that works together for better revenue management

Together with GameChanger for pricing, ScoreBoard for reporting and forecasting, and BlockBuster for group bookings, CommandCenter is part of an award-winning suite of SaaS products that give hoteliers the power to deploy modern pricing strategies and agile distribution which, in turn, maximize revenue and profit.

- ▶ Customize your CommandCenter home screen to access key information instantly, and segment and re-segment without losing data.
- ▶ Drive your strategy and take action from CommandCenter with visibility and highlights of where there are risks and opportunities across single or multiple properties.

Duetto Advance - created by hoteliers, for hoteliers.

“As a leading provider of powerful hospitality applications, Duetto not only recognizes challenges within our industry but also provides solutions that assist in simplifying the complexities of distribution while maximizing overall profitability.”

David Etmenan, Chief Executive Officer & Owner, Novum Hospitality
