

Introducing GameTime

An intuitive and agile revenue management solution (RMS) built for select-service hotel chains and enterprise brands with select-service and limited-service hotels in their portfolio.

Streamlined, scalable, built for you

Discover the power of GameTime – the streamlined RMS built around what matters most: essential revenue management tasks and maximizing your revenue.

Created for hotels with less complex needs, GameTime turns your data into actionable insights through simplified pricing strategy, rate automation and tailored reporting.

Why GameTime?

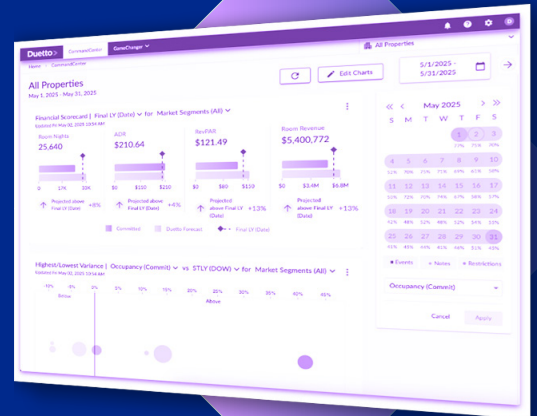

With its essential revenue management functionalities and user-friendly interface, GameTime is the go-to solution for select-service hotels:

- Automated rate updates based on real-time demand signals
- Enterprise pricing strategies aligned with your business goals
- Centralized view and rate management across multiple properties
- Key metrics at your fingertips: demand, pricing, revenue, and rate shops
- Dashboard to monitor performance across all properties
- Mobile-friendly for rate management on the go
- Fast, digital onboarding directly in the app

Scalable revenue management

A solution that grows with you. Optimize revenue in real time while maintaining control to adjust your pricing strategies, whether automated or manual.

- **Dynamic pricing:** Adjusts rates automatically 3x daily based on real-time demand.
- **Demand forecasting:** Analyzes historical booking data and occupancy rates to identify market trends and patterns, predicting future demand.
- **Competitor data:** Monitor market pricing to ensure your rates remain competitive.

Simple and efficient onboarding

No complex setups. GameTime reduces the complexity of traditional RMS implementations with a fully digital onboarding experience that's easy, fast, and intuitive — guiding you step by step to get up and running confidently.

- **Custom profiles:** Configure each property based on your specific needs.
- **Data field validation:** Ensure data accuracy throughout the setup.
- **Seamless data transfer:** Easily transfer data between properties to streamline multi-property onboarding.
- **Step-by-step guidance:** Confidently set up your pricing and strategy with clear support.

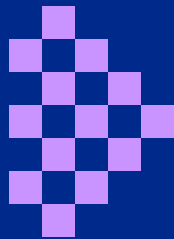

Real-time reporting and analytics

Track performance in real time, identify growth opportunities, and make confident, market data-driven decisions to optimize your revenue strategy.

- **Multi-property dashboards:** View data across groups and properties.
- **Easy customization:** Tailor your dashboards to your role and the properties you manage.
- **Track performance:** Select date ranges, view key metrics, and identify insights by stay date – all in one place.
- **Actionable insights:** Use purpose-built data views to answer specific questions around demand, performance, and pricing.
