

Unlock revenue opportunities and power what's next in revenue generation.

Drive strategic analysis, make smarter revenue decisions, and increase market share and profitability with seamless access to **Amadeus Demand360®**, **STR** historical performance*, and **PredictHQ** event data — all into your RMS.

Paired with **AI-driven revenue opportunity identification** and **dynamic pricing optimization**, Advance is your key to market leadership.

Optimize your pricing strategies around the clock

Dynamic optimization automatically detects, highlights, and acts on outliers in booking performance — so you never miss critical pricing opportunities, even when you're away from the office.

Assess

Harness real-time hotel booking performance data — combined with third-party market and competitive set data — to make more informed decisions.

Identify

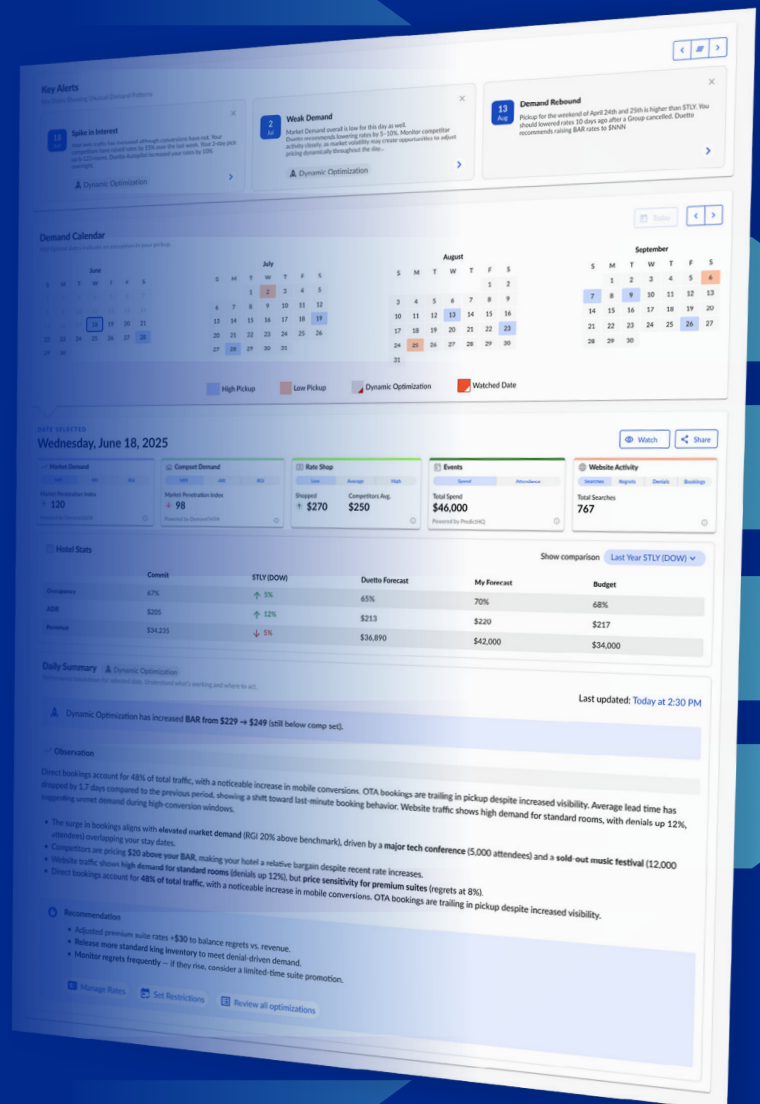

Leverage machine learning-powered insights and recommendations that correlate your hotel data with market trends, pinpointing key revenue opportunities and areas to improve.

Act

Dynamic optimization detects anomalies and triggers Duetto's pricing engine to update rates in real-time — ensuring you seize every opportunity.

Enhance

Share functionality promotes effortless collaboration across teams, improving workflow and operational efficiency, enhancing your competitive advantage, and driving incremental revenue.

Access to third-party data *in your RMS*, where it matters most

amADEUS

In an industry first, a subset of data from Amadeus' Demand360®, showing a 60-day forward-looking rate and demand data is now available and included in Advance subscription.

Build smarter pricing strategies using Amadeus Demand360® on-the-books data. View historical and future performance benchmarks against market and competitive sets — all from within Duetto — ensuring your rates are always in sync with demand.

Easily compare your property's historical performance to your comp set in one system, helping you make smarter pricing decisions and increase profitability.

Tap into past and future event data — including categories, venues, and estimated attendance — to provide context for demand and make data-driven pricing decisions.

* An active STR subscription is required.

Ready to maximize revenue and market share — *and minimize your worry?*
